

HARSH SHARMA

Vadodara, Gujarat | +91 6352532739 | harshsharmag98@gmail.com | [linkedin.com/in/harshxo44](https://www.linkedin.com/in/harshxo44) | github.com/Harshxo44

PROFESSIONAL SUMMARY

Computer Science Engineering student at Parul University with hands-on experience building AI-powered systems and full-stack web applications. Proficient in Node.js, Express.js, REST API development, and AI/ML pipeline integration (Whisper, XTTS-v2, Gemini API). AWS Certified Cloud Practitioner with strong foundations in Data Structures, Algorithms, and scalable system design.

TECHNICAL SKILLS

Languages: C++, JavaScript (ES6+), Python, Dart
Frontend: React.js, HTML5, CSS3, Tailwind CSS, Flutter
Back End: Node.js, Express.js, REST APIs, Spring Boot, Microservices
Databases: MongoDB, MySQL, Firebase Firestore
Cloud & Tools: AWS (Certified), Firebase, Git, GitHub, Postman, Google Colab, Docker, Azure AI, IBM Cloud
AI/ML: Machine Learning, Large Language Models (LLMs), TensorFlow, PyTorch, Keras, RAG, Vector Databases, PySpark, Deep Learning

EXPERIENCE

AI/ML Intern (Virtual) — CodSoft July 2026 – Present

- Working on machine learning projects using Python.
- Applying ML algorithms to practical datasets.
- Developing and testing AI/ML solutions as part of the internship.

PROJECTS

DubAI Studio — AI Video Dubbing Platform Oct 2025 – Present
Node.js, Express.js, Python, FFmpeg, XTTS-v2, Whisper, OpenVoice V2, Demucs

- Architected an end-to-end AI-powered multilingual video dubbing pipeline supporting 10+ languages with automated transcription, translation, and voice cloning.
- Integrated Faster Whisper, XTTS-v2, OpenVoice V2, and Demucs for high-quality speech synthesis and vocal separation workflows, significantly improving dubbing output quality.
- Engineered scalable REST APIs using Node.js and Express.js with asynchronous job processing and real-time progress tracking for concurrent video processing requests.
- Implemented hybrid GPU inference routing using Google Colab and ngrok tunnels, optimizing AI inference performance and reducing overall processing costs.

DriveLedger — Fleet Profit Management System Jan 2026 – Present
Flutter, Firebase, Cloud Firestore, Dart, FL Chart

- Developed a cross-platform financial management application for fleet owners and drivers featuring role-based workflow architecture across Android and iOS platforms.
- Integrated real-time data synchronization using Firebase Cloud Firestore, enabling live tracking of profit, expenses, and transactions across all connected devices.
- Designed interactive analytics dashboards using FL Chart for revenue and operational insights visualization, improving financial decision-making for fleet owners.
- Implemented secure user authentication using Firebase Authentication with Google Sign-In integration, ensuring data privacy and granular access control.

EDUCATION

B.Tech, Computer Science and Engineering 2023 – 2027
Parul University, Vadodara | CGPA: 6.47

RELEVANT COURSEWORK

Data Structures & Algorithms | Object-Oriented Programming | System Design | Database Management Systems | Computer Networks | Operating Systems

CERTIFICATIONS & ACHIEVEMENTS

- AWS Certified Cloud Practitioner — Amazon Web Services (cloud architecture, security, and deployment)
- IBM Java Developer Professional Certificate
- IBM AI Engineering Professional Certificate
- Google Advanced Data Analytics Professional Certificate
- Microsoft AI & ML Engineering Professional Certificate

AREAS OF INTEREST

- Backend Engineering — designing scalable REST APIs, microservices, and server-side architectures using Node.js and Express.js
- AI Systems & Automation — building production-grade AI pipelines integrating speech synthesis, transcription, and LLM APIs
- Competitive Programming — solving algorithmic problems with focus on Data Structures, Dynamic Programming, and Graph Theory
- Open Source Contribution — actively exploring projects in AI tooling and full-stack web development
