HARSH SHARMA

ENTRY-LEVEL SOFTWARE ENGINEER

Vadodara, Gujarat | +91 6352532739 | harshsharmag99@gmail.com
LinkedIn: linkedin.com/in/harshxo44 | GitHub: github.com/Harshxo44 | Portfolio: codewithaesthetic.vercel.app

PROFESSIONAL SUMMARY

Final-year B.Tech Computer Science student (2027) with hands-on project experience building a Node.js/Express API and integrating Python-based media-processing workflows. Also developed a Flutter application using Firebase for account-based data storage and financial summaries. Seeking entry-level software engineering or backend development roles.

TECHNICAL SKILLS

Languages: JavaScript, Python, Java, Dart
Backend: Node.js, Express.js, REST APIs
Frontend & Mobile: React.js, Vite, HTML, CSS, Tailwind CSS, Flutter
Databases & Tools: MySQL, MongoDB, Firebase Authentication, Cloud Firestore, Git, GitHub, Postman
Project Tools: FFmpeg, Faster Whisper, XTTS v2, Demucs, librosa, Google Colab, ngrok

PROJECTS

DubAI Studio — AI Video Dubbing Platform | *Node.js, Express, Python, FFmpeg, Faster Whisper, XTTS v2, Demucs*
https://github.com/Harshxo44/DubAI_Studio

- Built a video-dubbing pipeline to extract audio, separate vocals, transcribe and translate speech, generate dubbed audio, and mix audio back into the video.
- Implemented Express API routes for file upload, job status, and result handling, with in-memory job tracking and a Node.js-to-Python bridge.
- Documented local CPU execution and optional Google Colab GPU processing connected through an ngrok tunnel.

DriveLedger — Fleet Finance App | *Flutter, Dart, Firebase Authentication, Cloud Firestore, FL Chart*

- Built workflows for recording fleet income, expenses, transactions, and profit.
- Integrated Firebase Authentication with Google Sign-In and Cloud Firestore for user access and synchronized records.
- Added chart-based summaries to help users review financial records and operating expenses.

EXPERIENCE

AI/ML Intern (Virtual) — CodSoft | July 2026

- Built three machine-learning projects in Python: customer churn prediction (Random Forest), credit card fraud detection, and movie genre classification (TF-IDF with Logistic Regression).
- Packaged each project as a notebook and a standalone Python script with saved models and a requirements.txt for reproducible execution.

EDUCATION

B.Tech in Computer Science and Engineering | Parul University, Vadodara | 2023–2027
Relevant coursework: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks.

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- IBM Java Developer Professional Certificate
- IBM AI Engineering Professional Certificate
